

# Android Email Configuration

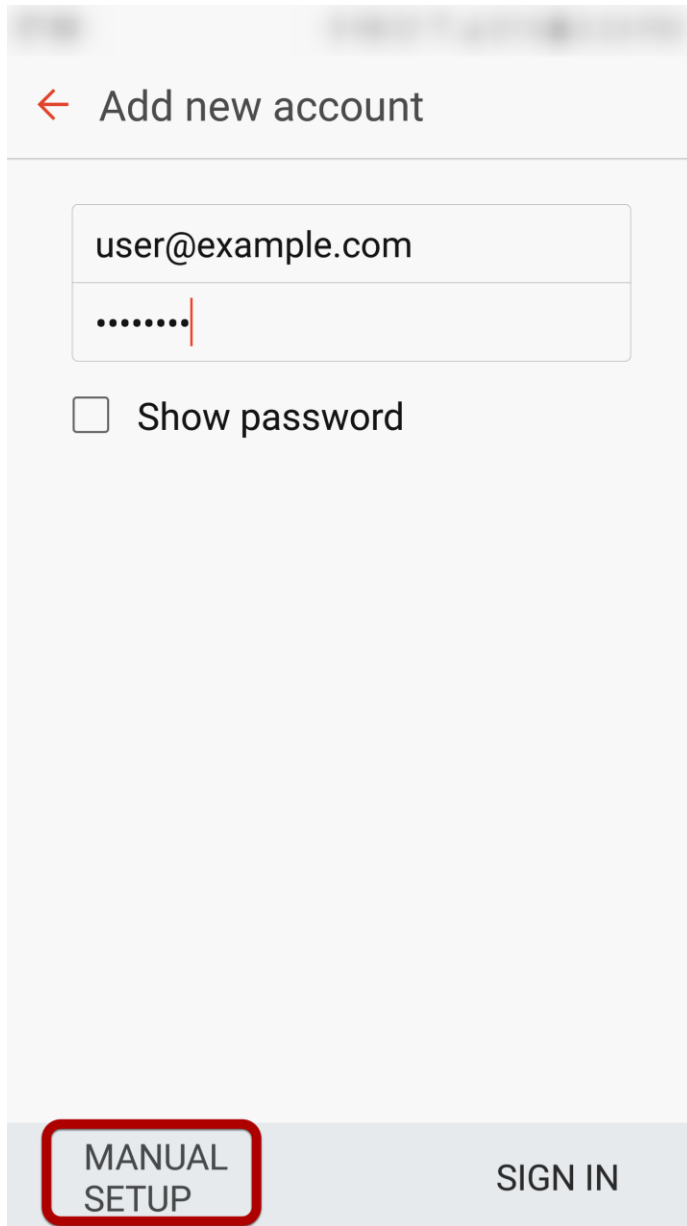

---

*This guide explains how to configure your Android device to access your email account. This tutorial was created running the Android 6 OS. If you are using different hardware or a different OS version, these instructions may differ.*

## **Webmail**

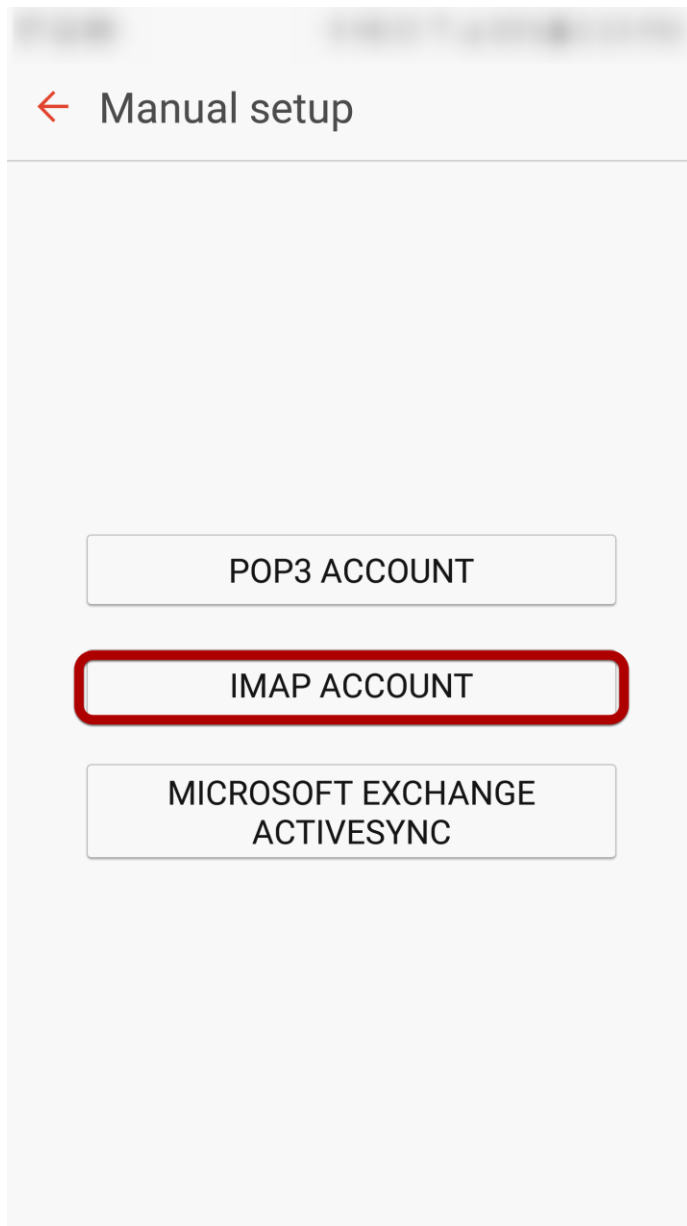

<https://mail.hostedemail.com>

Step 1: Open the Email application

Enter your email address and select **Manual Setup**

## Step 2: Select account type

Select **IMAP Account**

### Step 3: Enter Incoming Account Settings

### Enter the following information:

**Username** Enter your full email address.

### Password

The **Password** field is automatically filled in with the password that you created when you set up your email account.

### IMAP server

This is the name of the server which holds your email. Enter **mail.hostedemail.com**

### Port:

993

## Step 4: Enter Outgoing Server Settings
